

Lilly-Rose TERRAS

Computer Science Engineering Student - ENSEEIHT

First-year engineering student at ENSEEIHT in the Computer Science department. Backed by an initial software engineering research experience, I combine technical autonomy, programming skills, and strong teamwork.

Languages

French
English

Technical Skills

Python (Advanced)
Ada / Coq / Shell (Intermediate)
Development & Tools: Git, Technical Writing, Problem Solving

Expériences

IRIT (May 4 – June 12 2026)
Software Engineering Intern

- **Context** : Integration within a research team to design a multiple-choice question (MCQ) generation pipeline.
- **Missions and Achievements** :
- Developed a Python tool utilizing the Mako template engine to centralize and share questionnaire sources.
- Programmatically adapted output formats to ensure seamless compatibility with Moodle and Auto-Multiple-Choice (AMC) platforms.
- Conducted technical writing and documented the tool to ensure its long-term use within the laboratory.

Education

ENSEEIHT 2026 - Present
Engineering Degree, Computer Science Department.

Hobbies & Interests

Rugby: Team sport that taught me solidarity, commitment, and rigor.
TV Club (ENSEEIHT): Management of creative projects and multidisciplinary teamwork.
Reading & Culture: Manga, comics, contemporary literature.
